

Scrum for Team Members

Become a Scrum Member!

Introduction

Working as a team member in Scrum projects requires a different mind- and skill- set than working in traditional methodologies. Instead of being managed and getting tasks assigned to by project managers, a team working on Scrum projects will need to organize itself.

Xebia has created a custom-made course for team members to experience what it means to be self-organizing, what responsibilities come with it and what can be expected from fellow team members, the Product Owner and the Scrum Master. In this course, you will learn how to reach a higher level of productivity and have more fun at the same time!

Target Group

This course is strongly recommended to developers, testers, designers, architects and analysts.

Course Overview

This one-day course not only provides the fundamental principles of Scrum, it also gives participants hands-on experience for using Scrum. Theory will be put into practice by means of a one hour Scrum which stimulates a Scrum project by means of a non-technical group exercise.

Agenda

1. Agile
 - Where does it come from?
 - Values & Principles
2. Scrum
 - The Scrum Process
 - Roles
 - Roles and you
 - Requirements and day-to-day
 - Definition of Done
